This activity has been planned and implemented in accordance with the standards of the Academy of General Dentistry Program Approval for Continuing Education (PACE) through the Joint Program Provider Approval of CE Approved and Expert Dental Solutions. CE Approved is approved for awarding FAGD/MAGD credit.

# COURSE CONTENT

## A 4-day course of lectures and hands-on with real patients

Enhance your surgical techniques in periodontal and peri-implant plastic surgery with our intensive course, designed for trained dentists. This comprehensive program combines lectures with hands-on training on real patients, allowing participants to master aesthetic and functional surgical techniques.

Our program blends the latest clinical procedures with theoretical knowledge, enabling participants to execute key periodontal and peri-implant techniques effectively. Comprehensive teaching methods include didactic instruction, step-by-step surgical descriptions, and demonstrations of diagnostic planning and photographic records, equipping students with the confidence and skills to perform advanced aesthetic procedures.

## LEARNING OBJECTIVES

- Demonstrate proficiency in performing periodontal plastic surgery techniques, such as coronally advanced flap and subepithelial connective tissue graft, on real patients under one-on-one supervision.
- Apply conventional surgical techniques for papilla reconstruction, including semilunar coronal flaps, to address aesthetic deficiencies in clinical settings.
- Perform peri-implant soft tissue augmentation, such as tissue thickening with SCTG and rolled flaps, to optimize aesthetic profiles in patients.
- Select and integrate appropriate biomaterials, including autografts and collagen matrices, during surgical procedures to enhance clinical outcomes.

Course

# Directors

## Dr. Priscila Casado

As an Adjunct Professor at the Fluminense Federal University, she coordinates the Implant Dentistry Specialization Program and teaches in the Postgraduate Program in Dentistry (Doctorate and Master's levels). Her educational background includes a degree in Dentistry from UFF (2003), a specialization in Implant Dentistry, a Master's in Dentistry - Dental Clinics from UFF (2005), and a PhD in Morphological Sciences from the Federal University of Rio de Janeiro (2009).

With comprehensive academic and clinical experience, she is dedicated to advancing the field of periodontics and implant dentistry through innovative research, specialized training programs, and collaborative projects.

## Dr. Lorenzo Tavelli

Lorenzo Tavelli, DDS, MS, PhD, is a Harvard periodontist, researcher, and Assistant Professor. He's a University of Milan graduate with a Master's from the University of Michigan. A Diplomate of the American Board of Periodontology, he served as Director of Harvard's Postgraduate Periodontology. His research focuses on microsurgical, minimally invasive grafting around teeth and implants, using ultrasonography and biomarkers to enhance outcomes. Dr. Tavelli is a frequent speaker at major international symposia and has published over 150 scholarly articles in peer-reviewed journals. He currently serves as an Associate Editor for Clinical Implant Dentistry and Related Research. His awards include the 2024 ITI André Schroeder Prize, the 2023 Earl Robinson Award, and others.

# Where is our course held?

## Federal Fluminense University Rio de Janeiro - Brazil

The Fluminense Federal University School of Dentistry, located in Niterói, Rio de Janeiro, Brazil, is a prestigious institution known for its excellence in dental education and research. It offers comprehensive undergraduate and postgraduate programs, including specializations, master's, and doctoral degrees. Renowned for its state-of-the-art facilities and experienced faculty, the school emphasizes innovation in fields like periodontics, implant dentistry, and oral surgery. It also plays a significant role in community outreach, providing quality dental care to underserved populations.

Not only is it an ideal location for conducting dental treatment classes, but the training will also have an added social aspect: all practical cases will be free for patients due to the high demand for treatments among the population.

- **Date: August 6-9, 2026**
- **Hours: 8:30 am - 6 pm**
- **Investment: US\$ 9,900**

### What is included:

- Four days of live patient surgeries
